SPRINGER NATURE

Ведущие бренды нашего издательства

			
<p>Established in 1842 and a leading global scientific, technical and medical publisher, providing researchers in academia, scientific institutions and corporate R&D departments with quality content via innovative information products and services. Springer has one of the most significant STM eBook collections and archives, as well as a comprehensive portfolio of open access journals.</p>	<p>Founded in 1869, <i>Nature</i> is the world's most cited scientific journal, with over half a million citations a year. It is the number one multidisciplinary science journal globally with an Impact Factor of 41.456. <i>Nature</i> reaches millions of scientists and students at 4000 institutions worldwide, each month 3.5 million unique users view more than 8 million pages on <i>Nature's</i> website.</p>	<p>Macmillan Education is the third largest global provider of English language publishing in the world, a local K12 publisher and through Palgrave, a publisher and distributor of renowned higher education titles. Together they serve customers in 50 markets and supply high-quality content and innovative digital products and services to customers in 120 countries around the world.</p>	
			
<p>The largest open access publisher in the world, publishing over 286 peer reviewed open access journals across the fields of biology, biomedicine and medicine. With over 1.8 million registrants, BioMed Central can provide targeting opportunities across a range of specialities, job titles and disciplines.</p>	<p>A technical publisher devoted to meeting the needs of those in the information technology field. With more than 1,500 books in print and e-formats, Apress is the authoritative source for IT professionals, software developers, programmers and business leaders around the world.</p>	<p>Founded in 1845, <i>Scientific American</i> is the oldest continuously published magazine in the U.S. and the leading source and authority for science, technology information and policy for a general audience. The print edition is read by 3.5 million worldwide consumers and ScientificAmerican.com has an average of 5.5 million views every month.</p>	<p>A global academic and business publisher for the Humanities and Social Sciences (HSS). Palgrave Macmillan is the first boundary-free HSS publisher - working at all lengths and across all business models. It offers readers and authors a single source for the best in professional learning and scholarship.</p>

На наших сайтах вы сможете:

- 1.** Читать и скачивать все статьи, книги о самых новых достижениях в вашем направлении исследований.
- 2.** Использовать наши материалы при написании отчётов НИР, магистерских и докторских диссертаций, подбирать статьи для сопоставительного анализа передовых достижений в отрасли.
- 3.** Быстро и точно определять рейтинговые журналы под ваши темы исследования. Сразу же на сайте журнала узнавать есть ли у этих журналов импакт-фактор и есть ли они в Scopus.
- 4.** Ознакомиться с инструкциями и требованиями и подать вашу статью для публикации.
- 5.** Открывать и предоставлять дистанционный доступ вашим студентам, магистрантам, докторантам и преподавателям к полнотекстовой базе из дома, либо с сотовых телефонов.
- 6.** Использовать книги и главы как связанный курс учебных материалов

Требования министерств к ученым для публикации статей

1

- Список журналов издающихся внутри страны, одобренных министерствами для публикаций

2

- Список журналов, индексируемых в Clarivate Analytics (Thomson Reuters) и имеющих импакт-фактор (входят около 14 000 научных журналов)

3

- Список журналов, индексируемых в Scopus (входят около 21 000 научных журналов)

Springer Nature журналы, преимущества и позиции в рейтингах

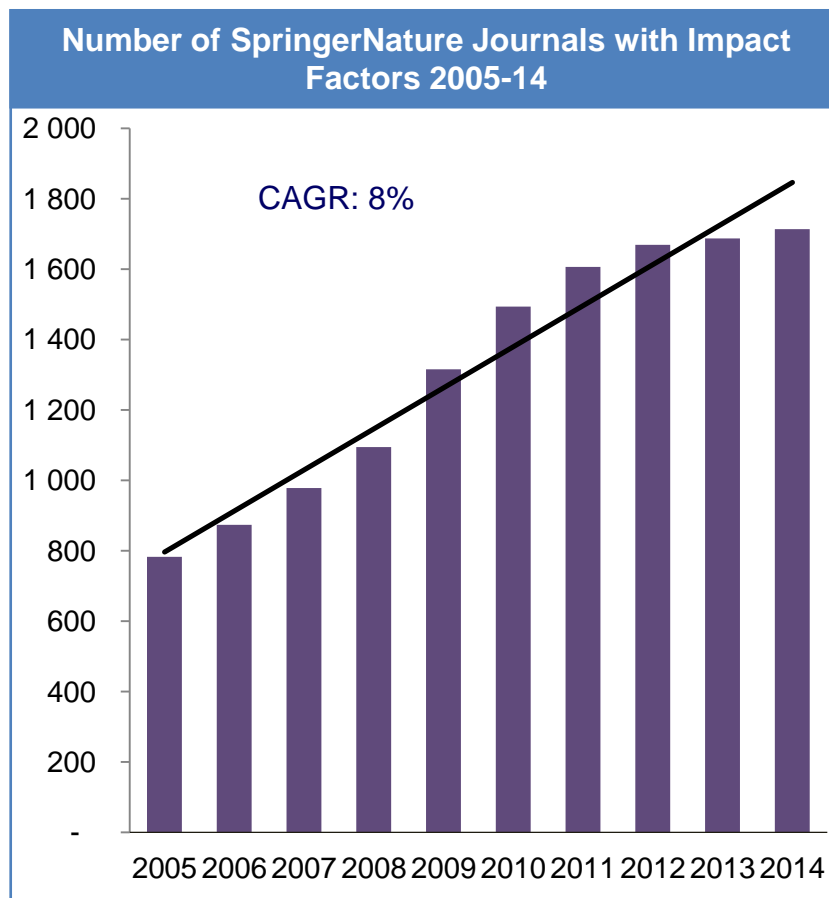

- В 2017 году согласно Journal Citation Reports у издательства Springer Nature **импакт-фактор получили 1,800 журналов.**
- В Scopus индексируется **2454 журнала Springer Nature**

Журналы SpringerNature согласно JCR лидируют по многим научным сферам:

28 категорий по которым наши журналы лидирующие в рейтингах

79 категорий в которых журналы SpringerNature входят в топ 3 рейтингов

155 журналов, которые входят в топ 1\4 рейтингов

Book structure

↑ Top

To guarantee a smooth publication of your manuscript into the final layout for online publication, ePub for eReaders, and print, your manuscript should be structured as follows:

- Front Matter: Title page, dedication (optional), list of contents, list of abbreviations (optional).
- Text Body: It comprises the chapters and references. Chapters can be grouped into parts.
- Back Matter: After the last chapter, there can be an index, a list of references, and a list of abbreviations, all of which are optional.

Front matter

Title page, preface, and table of contents precede the actual content of a book. The preface should be about the book: why it was written, who it is for, its organization, or the selection of contributors. An introduction in the subject of the book, however, should appear as the first chapter of the book. Optional items in the front matter at the beginning of a book are e.g., a foreword or a list of abbreviations.

Front matter

Title page, preface, and table of contents precede the actual content of a book. The preface should be about the book: why it was written, who it is for, its organization, or the selection of contributors. An introduction in the subject of the book, however, should appear as the first chapter of the book. Optional items in the front matter at the beginning of a book are e.g., a foreword or a list of abbreviations.

- ▶ Title page
- ▶ Preface
- ▶ Foreword
- ▶ Table of contents
- ▶ List of abbreviations

Chapters

Chapters contain the actual content of the book, i.e., text, figures, tables, and references. Chapters can be grouped together in parts; subparts are not possible. Only one chapter (e.g. an introductory chapter) may precede the first part and would be the first chapter.

- Decide the numbering style for the chapters and apply this style consistently to all chapters: consecutively numbered (monographs or textbooks) or unnumbered (contributed volumes).

Обязательно необходимо написать впечатляющее сопроводительное письмо

The Glasgow prognostic score (GPS) is of value for a variety of tumours. Several studies have investigated the prognostic value of the GPS in patients with metastatic breast cancer, but few studies have performed such an investigation for patients undergoing liver resection for liver metastases. Furthermore, there are currently no studies that have examined the prognostic value of the modified GPS (mGPS) in these patients. The present study evaluated the mGPS in terms of its prognostic value for postoperative death in patients undergoing liver resection for breast cancer liver metastases.

Дать информацию об исследовании

A total of 318 patients with breast cancer liver metastases who underwent hepatectomy over a 15-year period were included in this study. The mGPS was calculated based on the levels of C-reactive protein and albumin, and the disease-free survival and cancer-specific survival rates were evaluated in relation to the mGPS. Prognostic significance was retrospectively analyzed by univariate and multivariate analyses. Overall, the results showed a significant association between cancer-specific survival and the mGPS and carcinoembryonic antigen level, and a higher mGPS was associated with increased aggressiveness of liver recurrence and poorer survival in these patients.

Описать что было сделано и результаты

This study is the first to demonstrate that the preoperative mGPS, a simple clinical tool, is a useful prognostic factor for postoperative survival in patients undergoing curative resection for breast cancer liver metastases. This information is immediately clinically applicable for oncologists treating such patients. As a premier journal covering the broad field of cancer, we believe that the *Breast Cancer Research and Treatment* is the perfect platform from which to share our results with the international medical community.

Согласие с рецензентом

Комментарий рецензента: In your analysis of the data you have chosen to use a somewhat obscure fitting function (regression). In my opinion, a simple Gaussian function would have sufficed. Moreover, the results would be more instructive and easier to compare to previous results.

Согласие

Ответ: We agree with the reviewer's assessment of the analysis. Our tailored function form, makes it difficult to tell that this measurement constitutes a significant improvement over previously reported values. We describe our new analysis using a Gaussian fitting in our revised Results section (Page 6, Lines 12–18)
